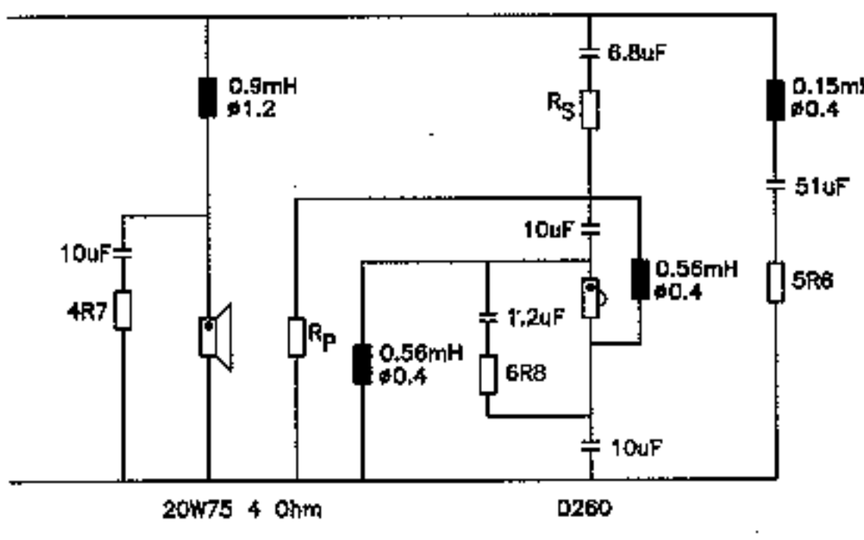
The Crossover.

► The Aries crossover is a typical Dynaudio construction. The usual rise of impedance at higher frequencies is compensated with an RC-circuit.

The Tweeter has an allpass filter integrated for optimized phase adaption. The total impedance of drivers and crossover is corrected by an additional RCL circuit resulting in constant impedance run of about 4 Ohms of the complete system.



The Kit.

2	Tweeter ESOTEC D-260
2	Woofer ESOTEC 20 W-75, 4 Ohms
2	Variovent (special Aries type)
2	Connection terminals
2	Aries crossovers
2	Damping bitumen pads 125x195 mm ea.
2	Damping foam 175x205 mm
6	Damping foam 175x110mm
6	Damping foam 175x240 mm
1	Damping wadding piece Q 370 g
1	Sealing glue LX-2
36	Self tapping screws 3.5x20 mm
1	3.2 m cable, dia 2.5 mm^2
2	DYNAUDIO badges
1	Blue-print

The Product.

► The Aries offers a listening culture of very high degree if source and the other components are chosen properly. The qualities get obvious whenever listening to music is intensified and convinces by its musical honesty and substance.
